Procedures and policies for maintenance and utilization of physical, academic and support facilities at MIT

The policies and procedures are framed by IQAC at Institute level for maintenance and utilization of physical, academic and support facilities at MIT. The IQAC invites the requirement of classrooms, laboratories and other necessary resources from each department well before the beginning of the academic year. The requirement is kept before the management committee. Any new facility constructed/ acquired is provided by the management before the commencement of the semester. The physical facilities including laboratories, classrooms and computers etc. are made available for the students who are admitted in the college. The buildings are maintained for their up-keep and repairs on a regular basis.

Right from its inception the college has been improving its infrastructure to meet its ever increasing growth. Additional blocks for academic and administrative purposes have been constructed. Floors have been added to the existing blocks to enhance the facilities. Renovation of older blocks and modernization of laboratories have been done to meet the ever changing academic requirements.

The Departments managed by their heads are responsible for maintaining the laboratory equipment for their operational conditions. They identify the agencies who would undertake the maintenance work and would get the equipment ready for operations before the beginning of every semester.

The institution has an IT cell headed by a senior member of the faculty to oversee the procurement, maintenance, repairs and replacement of equipment like computers, laptops, projectors and others in the domain area of information technology across the institution.
